

PROPOSAL ANNEXURE - TALLY PRIME ON MICROSOFT AZURE

Run Tally from anywhere - **hosted, backed-up & supported.**

A reviewed-and-sign annexure for SmartSoft's managed Tally-on-Azure service. The commercial model is simple: a fixed monthly base for the Azure infrastructure plus a per-user charge that covers RDP licensing, helpdesk and storage - with optional Microsoft 365 and Power BI add-ons.

PREPARED BY

SmartSoft

DOCUMENT

Tally Cloud Annexure v1.0

ISSUED

29 May 2026

VALIDITY

30 days from issue

Why move Tally to the cloud.

Local Tally servers are a single point of failure - one PC reboot, one disk crash, one ransomware event and the entire accounts team is offline. Hosting Tally Prime on a dedicated Azure Virtual Machine, accessed over RDP, gives every user the same Tally experience from any location, with daily backups, secure access and 99.9% uptime - on a predictable monthly OPEX.

99.9%

Azure VM uptime SLA

Daily

Automated backups, 30-day retention

Any device

Windows / Mac / iPad RDP access

7 days

PO to go-live

Azure Hosted VM

Dedicated Windows Server VM, Premium SSD storage, daily backup vault.

+

Per-User Access

RDS User CAL, secure login, L1 helpdesk and 10 GB user storage.

=

Tally, Anywhere

One Tally company, one dataset, every user always in sync.

What goes wrong with **local Tally servers**.

Most Indian SMBs still run Tally on a single office desktop with a shared folder. It works - until it doesn't.

The hidden costs only show up the day something breaks.

Single-PC dependency

One reboot, one Windows update, one disk failure and every accountant is locked out until the machine is back.

Branch & WFH access hacks

TeamViewer / AnyDesk shared sessions, one user at a time, no audit trail. Slow, fragile and a compliance risk.

No real off-site backup

A pen-drive copy on Fridays is not a backup. Ransomware encrypts the share and the pen drive in the same week.

Version-conflict chaos

Different Tally release on each desk, mismatched data folders, "why is my voucher missing" tickets every month-end.

After-hours support gap

A Saturday filing deadline + a frozen Tally = a panicked call to a local vendor who may or may not pick up.

No room to grow

Adding a new user, a new branch or a Power BI dashboard means buying hardware, OS, antivirus - all over again.

Two stacks. One Tally environment.

SmartSoft provisions and manages two clearly separated layers: the Azure infrastructure (billed as the fixed Base Cost) and per-user access & support (billed per concurrent user). Your existing Tally Prime / TallyPrime Server licences continue to be used and are not part of this proposal.

LAYER 1 - BASE INFRA

Azure infrastructure stack

Billed monthly as a fixed Base Cost, irrespective of user count.

- ✓ Dedicated Azure Virtual Machine (Standard D4s v5 - 4 vCPU, 16 GB RAM), Central India region
- ✓ Windows Server 2022 Datacenter licence (Azure Hybrid Benefit applied where applicable)
- ✓ OS Premium SSD (P10 - 128 GB) + Tally data Premium SSD (P15 - 256 GB, expandable)
- ✓ Azure Backup Standard vault, daily snapshot, 30-day retention
- ✓ Static public IP + monthly bandwidth allowance
- ✓ Microsoft Defender for Cloud, BitLocker disk encryption
- ✓ SmartSoft managed-services baseline - patching, monitoring, vault management

Sized for: **up to ~25 active users**

Region: **Central India**

LAYER 2 - PER USER

Access, licensing & support

Billed per concurrent user. Scales up or down quarterly.

- ✓ Remote Desktop Services User CAL (per user, monthly amortized)
- ✓ RDS Session Host on the hosted VM, RDS Gateway for secure access
- ✓ Active Directory user account, secure login
- ✓ Personal profile + 10 GB user-data allowance (Excel exports, scanned bills)
- ✓ SmartSoft L1 helpdesk - ticket + remote-takeover (business hours)
- ✓ One-time implementation amortized over the first 12 months
- ✓ Endpoint anti-virus on the hosted session

Tally licence: **Client-supplied**

Term: **Monthly / Annual**

Pricing model - **base + per user.**

A transparent two-line bill: a fixed Base Infra Cost for the Azure environment, plus a Per-User Charge that scales with the number of concurrent Tally users. All figures are **cost-optimised** - the Azure VM is quoted on a **1-year Reserved Instance** (~40% below pay-as-you-go) and the RDS User CAL is offered at a **50% subsidised rate** under SmartSoft's hosting bundle. All figures in INR, exclusive of 18% GST.

Azure 1-Year Reserved Instance

VM compute pre-paid for 12 months. Locked-in INR rate; significant saving versus pay-as-you-go.

Saves Rs.1.5 L / year

RDS User CAL - 50% bundle rate

Standard SPLA RDS CAL ~Rs.350/user/month is offered at Rs.175 under SmartSoft's hosted-Tally bundle.

Saves Rs.2,100 / user / year

3-Year RI option

Move to a 3-year Reserved Instance for ~60% off pay-as-you-go. Indicative figures available on request.

HOW YOUR MONTHLY BILL IS CALCULATED

Total / month

=

Base Infra Cost

+

(Per-User Charge × No. of users)

+

Optional add-ons

i All amounts shown are **indicative**, based on current Microsoft Azure India retail pricing and standard Microsoft licensing as of the issue date of this document. The final commercial quotation is locked at PO issuance and is subject to Azure list-price movement, FX variation and selected region. Annual figures assume a 12-month commitment and reflect approximately 5% discount over month-on-month billing.

A. Base Infra Cost - fixed per environment

LINE ITEM	SPECIFICATION	MONTHLY (INR)	ANNUAL (INR)
Azure Virtual Machine	Standard D4s v5 - 4 vCPU / 16 GB RAM, Windows licence-included, Central India - 1-Year Reserved Instance	11,000 vs 23,500 PAYG	1,32,000 save 1,50,000/yr
OS managed disk	Premium SSD P10 - 128 GB	1,500	17,100
Networking	Static public IP, RDS Gateway, 50 GB egress / month allowance	500	5,700
Base Infra Cost - total (optimised)		13,000	1,54,800

+ GST (18%) extra. Base cost is fixed for the configuration shown and does not vary with user count up to the sizing limit. **Optimised pricing assumes a 1-year Azure Reserved Instance prepayment for the VM compute**; a 3-year RI brings the VM line to ~Rs.9,400/month for a further ~Rs.19,200/year saving.

B. Per-User Charge - per concurrent Tally user

LINE ITEM	WHAT IT COVERS	MONTHLY / USER (INR)	ANNUAL / USER (INR)
RDS User CAL	Microsoft RDS User CAL (SPLA, amortized monthly) - 50% bundle rate	175 vs 350 list	1,995 save 2,100/yr/user
L1 helpdesk & support	Ticket + remote-takeover support, business hours, unlimited tickets	400	4,560
Implementation amortized	One-time setup of Rs.75,000 spread across first 12 months	200	2,280
User storage allowance	10 GB profile + Tally export storage per user (additional billed)	50	570
Per-User Charge - total (optimised)		825	9,405

+ GST (18%) extra. Annual rate reflects a ~5% commitment discount over month-on-month billing.

📊 Worked examples - what you'd actually pay (annual, ex GST)

12 USERS - INTRODUCTORY OFFER

Rs. 1,98,000 ~~Rs. 2,67,660~~

List: Base 1,54,800 + (12 × 9,405) = 2,67,660 / year

Discounted introductory price: Rs. 1,98,000 / year - approx Rs. 16,500 / month

+ GST (18%) extra on all amounts. For deployments above ~25 concurrent users, a larger VM size (D8s v5 / D16s v5) is recommended - Base Infra Cost is re-quoted accordingly.

C. One-time charges - paid once at project start (waived off as an introductory offer)

LINE ITEM	SCOPE	ONE-TIME (INR)
Environment provisioning	Azure subscription, VM build, disk, networking, security baseline	35,000
Tally data migration	Copy of existing Tally companies to hosted VM, integrity verification, cut-over plan	15,000
User training	2-hour session: RDP login, file transfer, do's & don'ts	5,000
One-time total (waived off as an introductory offer)		55,000 Rs. 0

+ GST (18%) extra where applicable. **The one-time setup is waived off in full as part of SmartSoft's introductory offer** for this proposal - customer pays only the monthly Base Infra + Per-User charges.

Optional integrations - **pick what you need.**

Add-ons are quoted separately and can be enabled at project start or any time later. Per-user add-ons follow the same per-concurrent-user model as the Base proposal.

Microsoft 365 Business Standard

OPTIONAL

Outlook, Word, Excel, PowerPoint and OneDrive available inside the hosted Tally session. OneDrive folder can be configured as the Tally export destination for automatic sync to laptops / phones.

Rs. 530 / user / month

+ GST

Power BI + Tally connector

OPTIONAL

Power BI Pro licence per user, ODBC connector configured on the hosted Tally, and SmartSoft-built starter dashboards (Sales, Receivables, Cash Flow, Inventory).

Rs. 950 / user / month

+ Rs. 40,000 one-time dashboard build

Additional data-disk capacity

OPTIONAL

Add more Tally / archive storage to the hosted VM in Premium SSD blocks. Snap-extended without downtime.

Rs. 3,000 / 5,500 / month

+256 GB / +512 GB block

Managed EDR on hosted VM

OPTIONAL

Sophos Intercept X with EDR on the hosted Tally server, with SmartSoft Tier-1 triage. Recommended for finance workloads.

Rs. 2,200 / month / server

+ GST

ASSUMPTIONS & EXCLUSIONS

- **Tally application licences** - Tally Prime / TallyPrime Server licences are supplied by the client and remain the client's property; not part of this proposal.
- **GST** - 18% IGST extra on all line items (infra, per-user, one-time and add-ons).
- **Azure pricing** - Indicative as of issue date; final figures locked at PO. Material movement (>5%) in Azure list price or USD/INR FX may trigger a quotation refresh.
- **Minimum term** - 12-month commitment. Per-user count is revisable upward at any time (within sizing limit); downward revisions take effect from the next quarter.
- **Sizing limit** - The Standard D4s v5 base sizing is comfortable for up to ~25 concurrent Tally users with typical voucher load. Larger user counts require a re-quote with a bigger VM.
- **Out of scope** - TDL customizations, Tally feature training, statutory return filing, and any third-party software not explicitly listed.
- **Internet** - Reliable broadband at customer premises is the client's responsibility. Minimum 2 Mbps per concurrent Tally user is recommended.

Six inclusions on every Tally Cloud order.

Full environment provisioning

Azure subscription, VM, disks, backup vault, networking, BitLocker, Defender for Cloud - ready to use.

Included

AD + RDS configuration

Active Directory, organisational units, GPO, RDS Session Host, RDS Gateway, per-user provisioning.

Included

Tally data migration

Existing companies copied to the hosted VM, integrity verified, weekend cut-over scheduled.

Included

Daily backup verification

Azure Backup runs daily; SmartSoft verifies snapshots and tests restore on a monthly cadence.

Included

Monthly health report

VM utilization, login statistics, backup status, security alerts and any remediation actions taken.

Included

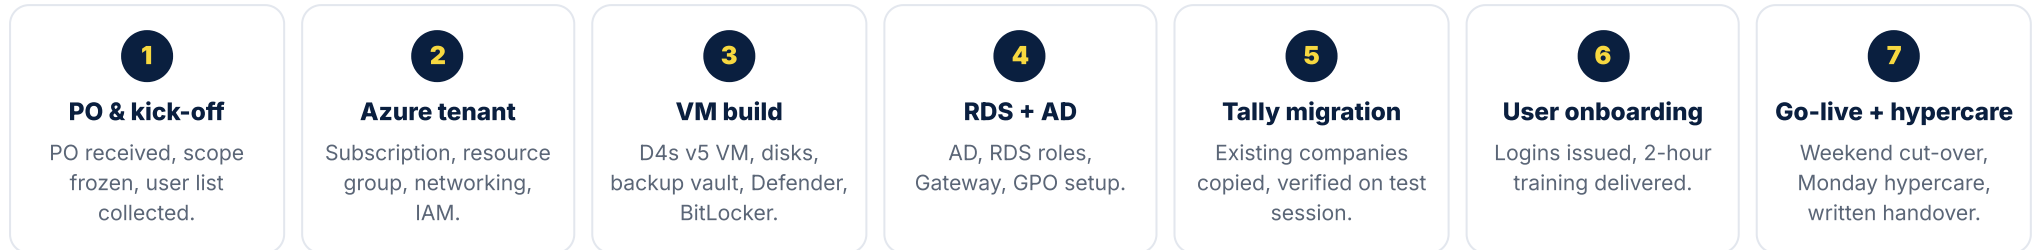

Quarterly cost-optimization

Review of Azure spend, right-sizing recommendations, reserved-instance opportunities. Savings passed through.

Included

From PO to go-live - 7 working days.

A predictable, low-touch onboarding led by SmartSoft engineers with a planned weekend cut-over so the accounts team starts Monday morning on the new environment.

ROLES & RESPONSIBILITIES

- **SmartSoft** - Azure subscription & environment build, OS patching, backup management, RDS & AD administration, L1 helpdesk, monthly reports, security monitoring.
- **Customer** - Provide Tally Prime / TallyPrime Server licences and existing company data, nominate IT point of contact, approve user list and cut-over weekend, ensure reliable internet at user locations.
- **Joint** - Quarterly cost-optimization review, annual DR drill (if DR add-on is enabled), capacity-planning review on user-count changes.

Support SLAs - **response & resolution.**

SLAs apply to the SmartSoft-managed hosted environment. Azure infrastructure uptime is covered separately by Microsoft's standard 99.9% single-VM SLA when Premium SSD is used.

SEVERITY	DESCRIPTION	RESPONSE TARGET	RESOLUTION TARGET	CHANNEL
P1	VM down / RDS gateway unreachable / Tally unreachable for all users	< 30 min	< 4 hrs	Phone + escalation
P2	Single user unable to log in / RDP slowness / backup failure	< 2 hrs	Same business day	Phone + email
P3	New user provisioning, password reset, file restore from backup	< 4 hrs	Next business day	Email / portal
P4	How-to question, report customization request, Power BI dashboard tweak	< 1 business day	Within 3 business days	Email / portal
REPORTING	Monthly health report + quarterly cost-optimization review	Scheduled	Monthly / Quarterly	Written report + readout call

Order & payment terms.

ORDER, BILLING & RENEWAL

- This proposal is valid for **30 days** from the issue date.
- All prices in INR. **GST (18% IGST) extra** on all line items.
- **One-time charges** - 100% on PO (or amortized over 12 months on request).
- **Base Infra Cost** - billed monthly in arrears as an Azure pass-through, against actual consumption. Annual prepay option available.
- **Per-User Charge** - billed monthly in advance, based on the user count provisioned on the 1st of the month.
- **Minimum term** - 12 months from go-live. Notice to terminate must be given at least 30 days before term end.
- **Data export on exit** - on termination or non-renewal, all Tally company data and user folders are returned within 7 working days in a portable format at no extra cost.
- **Quotation refresh** - SmartSoft reserves the right to refresh the quotation if Azure list prices or USD/INR FX move by more than 5% before PO.
